

Fractional Market Data Management

Expert Oversight without the Overhead

Turning Market Data Complexity into Clarity

the Challenge

Managing market data is complex and expensive. Buyside firms with smaller market data budgets often lack the resources for a dedicated in-house team, leading to:

- ❌ **Uncontrolled costs** – Subscriptions, unused services, and inefficient contracts drain budgets.
 - ❌ **Compliance risks** – Regulatory and vendor compliance failures can result in penalties.
 - ❌ **Inefficiencies** – Without clear visibility, firms struggle to optimize data usage and contracts.
- 💡 Does your firm have full visibility into its market data spend, usage, and compliance risks? If not, it's time to take control.

why Sprada

- ✓ Decades of Experience in market data management at large financial firms.
- ✓ Regional Expertise – Focused on the unique challenges of Asia Pacific financial institutions.
- ✓ Independent & Unbiased – We work solely for your interests, not the vendors.

the Solution: FMDM

Our fully managed service provides expert market data oversight without the need for an in-house team.

We ensure your firm remains cost-efficient, compliant, and strategically positioned by handling:

- ✓ **Market Data Inventory Management** – Complete visibility into all services and entitlements.
- ✓ **Cost Tracking & Optimization** – Reduce unnecessary spend and improve cost efficiency.
- ✓ **Contract Negotiation** – Secure better terms and align contracts with your needs.
- ✓ **Compliance Health Checks** – Avoid non-compliance risks with proactive oversight.
- ✓ **Dashboard Reporting** – Actionable insights for smarter decision-making..
